Managing Social and Human
Capital - Feb 2025

BMC Certificate - Feb 2025

Fundamentals of International
Business -Jan 2025

OB How to Manage
People - Sep 2024

PROFESSIONAL SUMMARY

Driven and socially responsible business professional with a passion for leveraging data-driven insights to tackle real-world challenges. Experienced in supporting both business and community initiatives, with strong skills in communication, strategic planning, and collaborative teamwork. Dedicated to delivering impactful solutions through innovative and ethical practices.

INTERNSHIP

Business Development Intern

LCS-LOGISTIC SECTOR,Chennai | May 2025 - June 2025

Assisted in lead generation, client interactions, and coordination with the sales team. Took initiative to manage responsibilities both independently and as part of a team. Recognized for strong professionalism, effective communication, and collaborative approach.

Let me know if you'd like it to sound more formal, concise, or tailored for a resume or LinkedIn profile.

Social Intern

Social Intern ZILLA PARISHAD HIGH SCHOOL , Andhara Pradesh

May 2024 - June 2024

Led social impact initiatives focused on empowering marginalized communities.

Collaborated with local authorities and volunteers to drive community engagement.

Strengthened leadership and team-building abilities through hands-on grassroots involvement.

PROJECTS

KNN Model Analysis & Comparison with SVM and Decision Tree

Developed and trained classification models using K-Nearest Neighbors (KNN), Support Vector Machine (SVM), and Decision Tree algorithms to analyze and predict outcomes based on complex datasets. Performed comprehensive data preprocessing techniques, including cleaning, normalization, and transformation, to ensure data quality and model readiness.

Executed feature selection processes to identify the most relevant variables contributing to model accuracy and efficiency. Carried out hyperparameter tuning for each algorithm using grid search and cross-validation to optimize performance and reduce overfitting.

Evaluated the effectiveness of each model by applying key performance metrics such as accuracy, precision, recall, F1-score, and confusion matrix. Compared results across models to determine strengths, limitations, and the most suitable approach for real-world application.

Extracted actionable insights from model outputs to support strategic recommendations, enabling data-driven decision-making and contributing to practical business solutions.

ACCOMPLISHMENTS

Designed, developed, and rigorously evaluated a suite of supervised machine learning models—including K-Nearest Neighbors (KNN), Support Vector Machine (SVM), and Decision Tree—as part of an academic research project focused on classification problems. Conducted in-depth data preprocessing, feature selection, and hyperparameter tuning to optimize model performance. Utilized key evaluation metrics such as accuracy, precision, recall, and F1-score to benchmark each model. Additionally, performed a comprehensive competitive analysis to assess the relative strengths, limitations, and real-world applicability of each algorithm, thereby deepening proficiency in data analysis and model interpretation.
